MOTHERHOOD.

Marked thus the strange, sweet radiance in her eye?
She has been near to heaven's shining portal,
And there, while Death and Life stood watching by,
Has plucked with trembling hand, a flower immortal.

—Esther Cottrell.

The burden of the country editor is too often the "load" which the printer tries to carry.

There seems to be no doubt that the new Carnegie company will be the biggest octopus in the business.

The evidence of continued hard feeling between Ballington Booth and his venerable father, William, as revealed in the petition of the former to have his son's name changed, so as not to bear the name of his grandparent, isn't exactly in line with true Christian spirit.

Altogether we have never seen a brighter prospect of democratic success along the line. The people have confidence in Mr. Bryan, whatever the republican editors may say, and his campaign this year will be memorable in our political annals for its brilliancy and success. The republicans will fight hard and with all sorts of weapons but the democrats stand to win. The voters have opened their eyes. —Atlanta Constitution.

Montagu White's Work.

Montagu White came to this country to promote the interests of the federated Boer republics. While he represents them, the delicacies of diplomacy are such that he bears no credentials to the government in Washington, but he is doing a vast amount of work. Mr. White's parents were Cape Colonists, but he was born in London. Mr. White has been a burgher of the Transvaal for years and has represented the republic as consul general at London. The war has materially decreased his income, but it has only increased his ardor for the cause of the "little peoples." He believes absolutely in the justice of the Boer cause and detects in equal measure the diplomacy of Chamberlain, that has led to war. Agreeable, polished and highly educated, he is as good a representative as the hard fighting Boers could have in this republic. —New York World.

At Work on the Globe Sheet.

Mr. Thomas Winsor, C. E. of the United States geological survey, with four assistants, arrived on Tuesday to resume the work of establishing altitudes on the Globe sheet, having finished on the Riverside sheet. The Globe sheet is in the form of a parallelogram extending from 110 min. 45 sec. to 111 min. longitude, and from 33 min. 15 sec. to 33 min. 30 sec. latitude, embracing an area eighteen by fifteen miles.

It will require about three weeks to complete the work of running levels in this district. The altitude is taken at distances of about three miles apart along traveled roads, and at two points at least in each township, and is marked by either iron posts set in the ground or by aluminum plates securely fastened to rocks not likely to be moved by the action of the elements. Working from Globe as a base or center every road will be covered to the boundary line of the sheet. Mr. Winsor and party started yesterday morning to work toward the Continental mines near the western limit of the sheet.

After the work of establishing altitudes has been completed, the party of government topographers, now in Pinal county, will come and make a map of the Globe sheet, which will be complete in every detail, showing every road, trail and house, and the exact contour of the country.

After the mapping of the district a thorough examination will be made by government experts, of the geological features, which will be of much value to the mining industry.

The Chloride correspondent of the Mineral Wealth says: The latest rich strike of ore was made in the Badger early this week by E. T. Loy and Wm. Miller, who own one-third and have the other two-thirds under lease and bond from Samuel Chadwick. The ore was struck in the tunnel that is being run on the vein, and is high grade argentiferous galena. The tunnel has reached a distance of 300 feet on the vein and the ore is coming out by the carload. They ship a carload this week and will average three carloads a week afterwards.

Payson News.

From Our Regular Correspondent.

Payson had several heavy showers during the past week.

Farmers have commenced plowing. Several parties have staked off lots with the intention of building homes here.

Dr. Maisch is back after an absence of three weeks in the lower country. The Klondike is laying in quite a supply of merchandise.

Isadore Christopher of East Tonto Creek was in on business on the 21st inst.

Ike Neiber was down from Pine Monday.

E. C. Conway was up from Gisela on business the 19th inst.

Jim Callahan sicked up and suddenly struck out for Tempe the early part of the week. There is a suspicion that Jimmie will bring back a side partner.

From the moves being made and the sudden rental of a cottage in town, we hope to be able to chronicle a marriage in our next.

The "Big 4" went out to Webber creek Tuesday last after samples of ore. From the amount of bottled ammunition, etc., taken with them, it is a question of what was samples.

Payson has never been surveyed for a township, but it is possible that at no distant day application will be made for such, when it will be found that some people would, if one notice could suffice, locate the earth.

There is an attempt being made to have the mail route between Young and Payson discontinued. Petitions and personal letters are being sent in to the department to continue such route, and it is to be hoped will be acted upon favorably to the people.

Mail contractors of the East who have to knowledge of the country should learn to take their medicine or quit bidding on contracts at starvation prices.

R. H. Schell was up from Tonto during the week. He reports that he is running a tunnel on the Black Diamond claim and has a splendid showing of sulphide ore. The tunnel is now in 30 feet.

T. G. Donlan is sinking a shaft on his gold property north of the Golden Wonder. At the depth of ten feet he has good ore carrying gold and copper.

A custom smelter, to work copper and gold ores, located centrally, having the Mazatzal, Gun Creek, Webber and Green valley districts to draw from, should be a paying investment.

As is the general rule in all mining camps, this section also has its share of "my people" experts, who never until they got into Arizona, and that of recent date, saw a mine or a prospect for one, yet they will represent themselves as being thoroughly up in the mining business. They will run from one district to another, and if unsuccessful in securing a bond on a property and on their terms, will immediately decry the property and district as worthless. It is about time that the owners of mining property of the several districts should take the case of blackmailers to task.

Persons Entitled to Vote for School Trustee.

Every person, male or female, of the age of 21 years or over, who is a citizen of the United States, and who has been a resident of the district for 30 days immediately preceding the day of election, and who is the parent or guardian of a child of school age residing in the district or who has paid a territorial or county school tax during the preceding year, is eligible to election, and shall be entitled to vote at such district election, provided that every woman offering to vote at such election (who is otherwise qualified under this section) and whose husband or father is or was a citizen of the United States, shall be treated and considered as a citizen of the United States for the purpose of voting at such election.

Registered at the Kinney House

March 22—H. J. Rice, San Francisco; Herbert A. Drachman, Tucson; H. F. Kauffman, San Antonio; Wm. Griffith, Tucson; C. A. Schofield, Los Angeles.
